COGNIPLANT Project has received funding from the EU Horizon 2020 Research and Innovation Programme, under Grant Agreement No. 869931

COGNIPLANT

COGNITIVE PLATFORM TO ENHANCE 360° PERFORMANCE AND SUSTAINABILITY OF THE EUROPEAN PROCESS INDUSTRY

October 2019 – March 2023

EU H2020 SPIRE Innovation Action

COGNIPLANT PROJECT

The COGNIPLANT solution will provide a hierarchical monitoring and supervisory control. The solution will give a comprehensive vision of the plants' production performance as well as the energy and resource consumption. Advanced data analytics will be applied to extract valuable information from the data collected about the processes and their effect on the production plants' overall performance enabling to design and simulate operation plans in digital twin models based on the conclusions. As a result, optimal operation plans will be obtained that will improve the performance of those cognitive production plants.

COGNIPLANT SOLUTION

OUR PARTNERS

OUR AMBITIONS

- Digitalisation in the European process industry
- Digital retrofitting
- Optimisation methods to distributed targeted process monitoring
- Advanced data analytics
- Development of digital twin
- Cognitive reasoning and reactive scheduling
